

Software Test

Lesson 13 Test Automation Homework v2.0

Uwe Gühl, Jittat Fakcharoenphol

Fall 2007/ 2008

Homework No. 1

- Web application testing with Selenium
Testing “i5”, URL: <http://158.108.183.10:3000/>
 - create two users (through testing interface)
 - make sure that each of you use different logins
 - *yourname_XXXXX*
 - log in as the first user
 - comment the second user, log out
 - log in as the second user, check, logout
 - destroy both users (again through testing interface)

Homework No. 1

(Practice – voluntary)

- Choose another requirement, create test script for it
- Suggestion:
 - if a user's account is deleted, all of the user's comments should be deleted as well
 - give fives
 - the account's login should be unique

Homework No. 2

- Final Documentation
 - For the final Lecture we would like to develop a final documentation – develop a second Draft!
 - Compare with Homework Lecture 12
 - Additional activities for “Enginy Team” (collection, coordination) and “No I in team” (time, quality)
 - Questions?
