

# Software Project Management

Lesson 1 – Introduction  
Homework – Feedback

Uwe Gühl  
Winter 2015 / 2016

# Homework

1. Send an email to [uweguehl@hotmail.com](mailto:uweguehl@hotmail.com) to get access to “KU Studentlist 01219343 2016”
2. When you got the link: Insert / update “KU Studentlist 01219343 2016”:
  - Name (English)
  - Nickname
  - Email
  - Login for TestLink /\* should get your login name for TestLink Test management system \*/
  - Topic /\* Topic you would like to present to class in pairs – please 2 students choose the same topic \*/

# Homework

## 3. One Pager

- a. of your project
- b. based on “simple specification KU clock” (in case you do not work on a project)
  - Please download the project one pager template <https://mike.cpe.ku.ac.th/~uwe/01219343>
  - Tailoring  
Define which parameter to use
  - Please enter all the necessary information about your project / KU clock project so that anyone could get an overview and basic understanding

## 4. Send your project one pager until 26.01.2016 to [uweguehl@hotmail.com](mailto:uweguehl@hotmail.com)

# Feedback

- It's a one pager – not 2 and 1/2 pages  
Think a little bit on advertisement / 5 minutes to explain your project
- Don't focus on technical stuff, sometimes difficult to understand for people from outside
  - E.g. Points system, Request progress
- Focus on business cases (customer / user point of view).  
What do you achieve for an end user like "messenger"?  
Like:
  - A customer could add a transportation request via Smartphone.
  - A customer could check the status of the transported item.

# Feedback

- Stakeholder / To be informed
  - Not same to Principal / Project Board / Project team
  - Additional roles like “KU administration”, representative of potential customers
- Project start / end  
Exact dates, especially in short term projects

# Feedback

- Project scope
  - Talk about business cases. Talk about the big points.
  - Do not talk about details like
    - Available in English language.
    - Services are available in Bangkok area only
- Milestones
  - Milestones with dates
  - Talk about the most important topics to be achieved, maybe only one per milestone
  - Please as business case

# Feedback

- Roles
  - Too detailed in this context: Users, Messengers, sender, recipient, administrator.
  - In this context you should focus on business user roles only.
